

The online service established to provide a **single-source, secure database** of pharmacy-managed profiles required for the verification and credentialing of pharmacy partners.

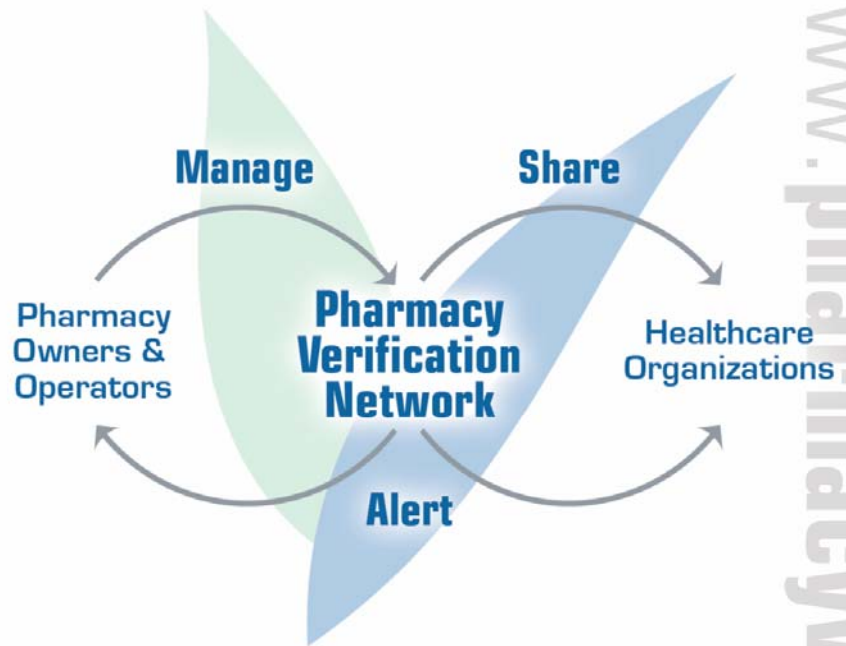

Benefits to Pharmacy Owners & Operators

- Create and manage your pharmacy profiles in a trusted industry database
- Share this critical information with approved healthcare partners
- Reduce the amount of time it takes to respond to requests from your approved healthcare partners by providing a single, online source of your pharmacy's credential information.

Benefits to Managed Care Organizations, Health Plans and Pharmacy Benefit Managers

- Access pharmacy profiles by pharmacy, type, geography, services offered and more...
- Create custom reports and download pharmacy profiles
- Eliminate time consuming and costly calls to pharmacies attempting to validate specific pharmacy information
